**407.834-TECH**

Auritas is an established provider of SAP professional services and solutions, including **Data Archiving, DART, Imaging, Workflow, Data Migration, Output Management** and **Communication Management**

## **Data Archiving Services**

Auritas SAP Data Archiving and DART project plans are so detailed on every task and implication that we can pride ourselves in having a very predictable timeframe for an implementation. Our goal is to provide for you, maximum results out of minimum consulting time and in-house efforts. We can do this with or without any third party tools or costs.

Auritas can provide:

- ❑ SAP Data Archiving or DART Workshops to help analyze your environment and assist in defining the scope and objectives of your projects.
- ❑ Systems Maintenance services for Data Archiving, DART and Imaging services.
- ❑ Data Analysis of database size and growth to help identify relevant archiving objects.
- ❑ Remote systems analysis and/or remote consulting services to minimize consulting costs.
- ❑ Custom development of archive objects.
- ❑ Enhancement of the retrieval methods provided by SAP like DRB.
- ❑ Printlists
- ❑ We also provide Data archiving within BW and other APO solutions.
- ❑ Documentation to comply with any audit requirements.
- ❑ Data Migration services
- ❑ Services to comply with Sarbanes-Oxley.
- ❑ Services can also be provided on an on-call or as-needed basis.
- ❑ Training classes in the areas of; SAP Data Archiving, DART, Imaging or Workflow applications

Auritas Data Archiving solutions include:

- ❑ Supporting data archiving and document management in SAP with or without using a third party solution.
- ❑ We can provide SAP Document management solutions to our customers using different archiving scenarios.
- ❑ Our implementations include; SAP Archivelink managed and non-archive link management solutions.
- ❑ Auritas can supply services to migrate data and documents from one storage to another.
- ❑ Using data archiving, Auritas can consolidate information from many to a singular system and vice versa.

## **Additional Services**

Auritas also has consultants available across other areas in SAP.

Our SAP Functional Business Analysts are able to provide: Business Process mapping/modeling, Gap Analysis, Configuration, Project scope development, Functional support, Technical Training and Development of Technical documentation. Our Functional resources have expertise across all the core modules, as well as; BW, APO, CRM, etc.

Our SAP Technical Developers are well versed in the latest software versions as well as the tools and interface software necessary for most implementations. They are well experienced in providing: Custom Reports, Testing, Data Conversions, Data Migrations, Interfaces, EDI Capabilities, as well as Creating User Exits.

Our SAP Basis Administrators are able to provide our customers with on-going maintenance and support, as well as support for a new installation or upgrade project. In addition we can provide specialists who are well versed in security, disaster recovery, and archiving.

## **Contact us**
